REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record do not anticipate nor do they reasonably suggest the mounting structure for connecting detachably a saw blade guard to a worktable of a bench saw. The closest prior art, Bartlett et al (US 4,721,023), teaches a typical fastening means, i.e. set screw (52, 54), for mounting of the blade guard. However, such a fastener lacks a conical hole and a cone fitted into the conical hole. Moreover, none of the other prior art of record fairly teach or suggest this lacking feature.

It is noted that a conical fastener is known per se for the obvious advantages of having the connection be a more "clamped" engagement versus a typical non-conical fastener, i.e. flat surface to surface and straight through hole. However, it is the Examiner's opinion that there is no teaching or suggestion to provide such a fastener to the blade guard mounting without stepping over the bounds of improper hindsight reasoning. One of ordinary skill in the art knows that a simple threaded bolt engagement is usually sufficient for the attachment purposes, and therefore there is no obvious need to provide a different fastener such as Applicant's.

In sum, it is believed that the claimed invention in combination with all the other recited structure is allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
